## SUMMARY

Full Stack Software Engineer with 3+ years of experience in fast-paced startup environments. Proficient in JavaScript, TypeScript, React, Node.js, SQL (PostgreSQL), NoSQL (DynamoDB), and AWS.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, HTML/CSS

**Frontend:** React, Redux, Next.js, Tailwind CSS, Sass, GraphQL

**Backend:** Node.js, Express.js

**Dev Tools & Other:** AWS, Docker, Git, SQL (PostgreSQL), NoSQL (DynamoDB), Jest, Cypress, Vercel

## WORK EXPERIENCE

### Software Engineer Front End

Apr. 2022 – Present

*Cyber Dive*

*Mesa, AZ (Remote)*

- Refactored the Parent Dashboard's homepage using React, reducing initial frontend network calls from over 50 to under 10, leading to significant improvements in LCP and overall performance.
- Built and maintained Cyber Dive's design system with Bit.dev, migrating over 100 React components to enhance code reusability and streamline frontend development.
- Led the development of the installed apps notifications feature using Node.js and AWS Lambda, increasing customer satisfaction by 30% through real-time alerts when children download new apps.
- Led the development of the Shared Dashboard feature, collaborating cross-functionally to deliver a seamless UI/UX that enabled multi-parent monitoring through React and Redux.
- Repaired and optimized CI/CD pipelines for the Parent Dashboard, improving delivery speed, code quality, and system stability by upgrading pre-commit, unit-test, build, and sonar scripts.
- Mentored new frontend engineers, led code architecture discussions, and served as the go-to resource for React best practices and component-driven development.

### Software Engineer

June 2020 – Aug. 2020

*Presently*

*New York, NY*

- Built Presently's group gifting message system by implementing real-time queries from the database, enhancing system responsiveness.
- Developed a dynamic referral page that increased user engagement by 3% through A/B testing.
- Collaborated with team members to ensure seamless feature deployment.
- Utilized Python and JavaScript to develop robust and user-centric solutions.

## EDUCATION

### Syracuse University

Syracuse, NY

*B.S. in Systems and Information Science*

*2017 – 2021*

## PROJECTS

### Work Portfolio Website 🌐 | TypeScript, React, Vercel

Mar. 2024

- Developed a responsive portfolio site using React and TypeScript to showcase engineering projects.
- Deployed on Vercel with focus on speed, UX, and modular architecture.
